Julian Lingurini

Full Stack Developer & AI Engineer

0223-421-4414| lingurinijulian.dev@gmail.com | Mar del Plata, BA| linkedin.com/in/julian-lingurini

PROFESSIONAL OVERVIEW

Full Stack Developer and AI Engineer, Systems Analyst and AWS Certified AI Practitioner. I build end-to-end web platforms that solve real business problems, from booking systems with online payments and real-time slot locking to dealership catalogs and admin panels, using TypeScript, React, Next.js, Prisma, and ASP.NET (C#). I combine full-stack development with AI solutions on AWS, and use tools like Claude Code in my daily workflow to ship faster without compromising quality.

WORK EXPERIENCE

Full Stack Engineer | Freelance, JBJ Automotores, Argentina JUN 2026 – AUG 2026

- Built the dealership's web platform end-to-end —public catalog and admin panel— on Next.js 16, React 19, Prisma 7, and MySQL.
- Implemented authentication with Auth.js v5 and role-based access control, adding rate limiting by IP and by account, input validation with Zod in server actions, and server-side signed image uploads.
- Automated quality and deployment with automated tests covering critical flows and a GitHub Actions pipeline that applies migrations from scratch and runs lint, type-checking, tests, and build on every push.

Full Stack Developer | Freelance, New SurfBoards, Argentina APR 2026 – JUL 2026

- Designed and built the custom surfboard configurator end-to-end, from the data model to the public interface, on an e-commerce and inventory platform built with Next.js, React, TypeScript, and Prisma.
- Built the module's admin panel, letting the client manage configurator options without developer intervention. Integrated Cloudinary for image storage.

Full Stack Developer | Freelance, Mayoraz Barber, Argentina MAR 2026 – MAY 2026

- Web-based appointment booking platform for barbershops, developed as part of a team with Next.js, React, TypeScript, Prisma, and MySQL.
- Implemented real-time slot locking with WebSockets to prevent duplicate bookings for the same time slot. Integrated Mercado Pago for online deposit payments, with automatic expiration of unpaid appointments and email notifications.
- Built the admin panel (services, barbers, schedules, and exceptions) with role-based access control.

EDUCATION

Systems Analyst | Instituto Argentino de la Empresa, Mar del Plata Graduated: 2025
Certified AI Practitioner| Amazon Web Services Training and Certification Graduated: 2026

SKILLS

Next.js, TypeScript, MySQL, Claude Code, SCRUM, English - Upper-Intermediate
Teamwork, Communication, Responsible
