EXPERIENCE

AI Engineer

Oct 2025 — Dec 2025

Automax

Contractor

- **Engineered** automated AI agents using n8n to streamline restaurant operations, enabling seamless creation, modification, and cancellation of reservations, alongside automated order generation, reducing manual processing time by 30%
- **Streamlined** backend communication by refining how JSON data is received and parsed, establishing a robust categorization system for cleaner and more structured data architecture.

Full Stack Developer

Mar 2024 — Dec 2024

Instituto Argentino de la Empresa

Mar del Plata, BA

- **Technologies:** C#, TypeScript and SQL Server
- **Architected and developed** a comprehensive student portal that streamlined the registration process for final examinations.
- **Spearheaded** the design and implementation of the project's database architecture, ensuring data integrity, scalability, and optimal performance.
- **Collaborated** cross-functionally with both front-end and back-end teams, guiding critical technical decisions and conducting rigorous version testing to ensure deployment stability.

Data Analyst

May 2023 — Mar 2024

Cooperativa de Trabajo Pesquera Nuevo Rumbo

Mar del Plata, BA

- **Analyzed** production and operational data using Advanced Excel, generating comprehensive reports to monitor quality control and optimize process efficiency across all stages.
- **Developed** custom inventory management trackers and product performance dashboards in Excel, ensuring accurate stock control and facilitating data-driven decision-making.
- **Processed** customer feedback and inquiry data, translating raw information into actionable insights to guarantee high satisfaction rates and improve service delivery.

Full Stack Developer

Feb 2026 — Present

JBJ Automotores

Contractor

- **Technologies:** C#, .NET Core, TypeScript, React - Vite, MySQL
- **Engineered** a dynamic, full-stack web platform for an automotive dealership, leveraging **TypeScript** for a highly responsive front-end and **C#** for a robust, scalable back-end architecture.
- **Designed and implemented** a comprehensive digital vehicle catalog, enabling users to seamlessly browse, filter, and access in-depth specifications for the company's entire inventory.

SKILLS

Cloud Computing: AWS

Programming Languages: C#, TypeScript, JavaScript, Java, C++, WPF, WinForms, HTML, CSS

Database: SQL Server, MySQL
